

# Automations that make life easier

ENG For doors and frames

Advanced entrance technology

## **Friendly automations**

Being able to move or travel from the home or the office does not necessarily involve using the internet or a TV.

The first “journey” taken by man stems from his relation with the surrounding world – hence the essential role of architecture, whether it relates to residential, commercial, tertiary or industrial buildings.

DITEC automations for doors and frames allow better planning of living areas and environments, making them suitable for a wider number of people and meeting all the requirements relating to better comfort, safety and accessibility, especially for the most vulnerable.

Automating doors and frames does not just improve the overall architectural look of a building, but can also give it a new perspective by ensuring that both able and less able people can use it without any physical or psychological barrier, throughout all the stages of their life.

## **More comfort in your living areas, more freedom in your life**

DITEC automations make living areas more comfortable and practical to live in, and are truly helpful for older or less fortunate people.

For them, lift, entrance and bedroom doors and external frames often represent major hurdles. DITEC is able to offer suitable automations to address these issues.

They are easy to install automations, both mechanically and electrically, even when fitted onto existing frames. They do not require any special maintenance and are unobtrusive. Safety is assured by a very low voltage power supply (12 V - see the technical specifications on each model) and by being fitted with DITEC genuine control, monitoring and safety systems.

## **Easy to install even on pre-existing frames**

Automations that make life easier

For doors and frames

► Even a pushchair or several bags can reduce mobility

► The pantry and the walk-in wardrobe. Much easier to enter without manually opening the door

► The lift becomes easier to use

► Open and close the shutters without going outside or, in case of bad weather, without opening the windows

► The practical and time-saving automation

► Adds more class and value to your offices

**▶ A full range to meet all requirements**

**▶ Olly C**

For up to 40 kg sliding doors and frames.

**▶ Olly E**

For up to 80 kg sliding wings.

**▶ Dok E**

For up to 250 kg sliding wings.

**▶ Dok M**

For sliding doors and frames with up to 100 kg wing.

**▶ Civik**

For up to 60 kg sliding doors. Motor complete with sliding guide, with microprocessor based control panel and encoder.

**▶ Radius**

For swing shutters.

**▶ Sprint**

For swing doors. Compact yet effective.

**▶ Wel**

For swing doors. New, sturdy and complete. Also suitable for fireproof doors.

## Automation accessories

The wide range of DITEC accessories offers access system fitted with several types of control and monitoring devices.

Activation radar

Active infrared barriers

Safety photocells

Control buttons

Opening sensors

Control systems

When building the system, only use DITEC accessories and safety devices.

DITEC automations all feature CE marking and are designed and built in compliance with the safety requirements of the Machinery Directive (2006/42/EC), of the Electromagnetic Compatibility Directive (2004/108/EC) and of the Low Voltage Directive (2006/95/EC) and of other Directives, laws, specific standards for special products and situations.

DITEC S.p.A. reserves the right to make changes which may improve the products. DITEC S.p.A. always strives to improve its products. For this reason, the technical details featured in this catalogue are not binding.

The pictures shown in this leaflet were taken with the consent of those concerned or in public locations.
